Q&A

Question: What is the key thing to know about anti-inflammatory smoothie recipes for joint pain?

Short answer: Anti-inflammatory smoothies are an easy way to combine ingredients with real evidence for joint inflammation: beetroot (betalains), berries (anthocyanins), fresh ginger (gingerols), turmeric with black pepper (curcumin) and flaxseed (omega-3 ALA). Blend with unsweetened plant milk or Greek yoghurt and drink one a day for a fortnight to see whether pain or stiffness improves.

Question: When should I seek professional advice?

Short answer: If symptoms persist or worsen, pain is severe and unresponsive to usual relief, or you develop new symptoms, contact your GP, physiotherapist or rheumatology team promptly.
